***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Group I. Claims 8-11 are drawn to "a method for writing a cipher key on a recording medium", classified in class 380, subclass 277.
- Group II. Claims 12-18 and 26-34 are drawn to "a method for reproduction of information recorded on an optical disc", classified in class 713, subclass 193.
- Group III. Claims 19-25 and 35-39 are drawn to "a method for allowing reproduction of information recorded on a recording medium", classified in class 713, subclass 193.
- Group IV. Claims 40-42 are drawn to "an optical disc with allocated areas containing disk ID and a cipher key", classified in class 713, subclass 193.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II, III, IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if

Art Unit: 2132

they are shown to be separately usable. In the instant case, invention I is separately usable "for writing a generated cipher key on a recording medium". See MPEP § 806.05(d).

Inventions II and I, III, IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II is separately usable "for reproduction of information specific to an optical disc". See MPEP § 806.05(d).

Inventions III and I, II, IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III is separately usable "for reproduction of information recorded on any kind of recording medium. The medium is not limited to an optical disc". See MPEP § 806.05(d).

Inventions IV and I, II, III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention IV is separately usable "for providing an optical disk comprising of sections recorded with information associated with the disc, a cipher key and program information". See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III, and IV, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Eugene Lieberstein on May 24, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement to be traversed (37 CFR 1.143).

### ***Priority***

Applicant is reminded that in order for a patent issuing on the instant application to obtain the benefit of priority based on priority papers filed in parent Application No. JAPAN 014752/1997 filed 01/10/1997 under 35 U.S.C. 119(a)-(d) or (f), a claim for such foreign priority must be made in this application. In making such claim, applicant may simply identify the application containing the priority papers. A reference to the prior

application must be inserted as the first sentence of the specification of this application or in an application data sheet (37 CFR 1.76), if applicant intends to rely on the filing date of the prior application under 35 U.S.C. 119(e) or 120. See 37 CFR 1.78(a). For benefit claims under 35 U.S.C. 120, the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of all nonprovisional applications. Also, the current status of all nonprovisional parent applications referenced should be included.

If the application is a utility or plant application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the specific reference to the prior application must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a utility or plant application which entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the specific reference must be submitted during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A priority claim filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed claim for priority under 35

Art Unit: 2132

U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted), (2) a surcharge under 37 CFR 1.17(t), and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was unintentional. The petition should be addressed to: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.
